ACTIVITIES

PROJECTS

ELM – The European Language Monitor
http://efnil.org/projects/elm
- What is the European Language Monitor (ELM)?
  The ELM intends to provide a rich and complex empirical basis for the development and evaluation of national and European language policies. It is conceived as an online system to collect data and provide detailed up-to-date information on the linguistic situation and its development in the various member states of the European Union and possibly, also, of other European countries.

- For whom is the ELM?
  Target groups of the ELM are primarily policy makers at the national and European level. ELM should also be of use for linguists, sociologists, publishers, journalists, and other persons who are more or less involved or interested in language development and language policy.

EFNILEX – Automatically generated online prototype dictionaries
http://efnil.org/projects/efnilex
- What is the objective of EFNILEX?
  To find a method that facilitates the creation of bilingual dictionaries by automatic means.

- Why is it important?
  To help the production of dictionaries for lesser used languages by reducing the human effort needed for lexicographic work.

- What are the pros and cons of EFNILEX?
  Pros: Time and cost-effective, decreases the reliance on human intuition during lexicographic work, gives hints about the best translation candidate.
  Cons: The creation of parallel corpora is rather tedious for lesser used languages, the method in its present state deals only with one-token units, the resulting dictionary might also include incorrect translation candidates, as well.

LLE – Language Legislation in Europe
http://efnil.org/projects/lle

To purpose of LLE is to monitor language legislations in member states of the EU. In magazine to a questionnaire EFNIL members described the language legislation in effect in each of the member states. The resulting survey is published on the EFNIL website and is updated regularly by member institutions.
