THE PURPOSE OF THE FEDERATION IS:

- The collection and exchange of information about the officially recognized standard languages of the EU and other official European languages;
- The provision of expert advice about language policy in the EU;
- The preservation of linguistic diversity within Europe;
- The promotion of plurilingualism amongst the citizens of the EU states;
- The Federation also maintains an interest in the minority and regional languages of Europe.

TO THIS END, THE FEDERATION SEeks TO ENGAGE IN:

- Projects relating to the description and analysis of the current linguistic situation within the EU as well as implications for longer-term linguistic development;
- Scientifically based analysis of cross-state language problems and deviations of language policy;
- Consultation services in the field of language policy for political decision-makers of the EU institutions and member states;
- Propagation of the cultural and practical benefits of European linguistic diversity and plurilingualism through relevant actions and publications;
- All other activities which contribute to its aims.

PROJECTS

- ELM – The European Language Monitor
  http://efnil.org/projects/elm

  - What is the European Language Monitor (ELM)?
  - The ELM intends to provide a rich and complex empirical basis for the development and evaluation of national and European language policies.
  - It is conceived as an online system to collect data and provide detailed up-to-date information on the linguistic situation and its development in the various member states of the European Union and possibly, also, of other European countries.

- LLE – Language Legislation in Europe
  http://efnil.org/projects/lle

  - What is the European Language Legislation Monitor (LLE)?
  - To find a method that fulfills the criteria of bilingual dictionaries by automatic means.
  - Why is it important?
  - To help the production of dictionaries for lesser used languages by reducing the human effort needed for lexicographic work.
  - What are the pros and cons of EFNILEX?
    - Pros: Time and cost-effective, decreases the reliance on human intuition during lexicographic work, gives hints about the best translation candidate.
    - Cons: The creation of parallel corpora is rather tedious for lesser used languages, the method in its present state deals only with one-token units, the resulting dictionary might also include incorrect translation candidates, as well.

- EFNILEX – Automatically generated online prototype dictionaries
  http://efnil.org/projects/efnilex

  - What is the objective of EFNILEX?
  - To find a method that fulfills the criteria of bilingual dictionaries by automatic means.
